eternaLight™s are the most Technologically Advanced personal lighting instruments available!

eternaLight™ Standard features:

Four independent solid-state WHITE LED bulbs insure power, reliability and safety. Each bulb is rated at over 100,000 hours of continuous use. The built-in microprocessor controls power utilization extending battery life way beyond ordinary or other LED flashlights - up to 700 hours on standard AA alkaline batteries! And, it also provides many other useful features like:

- **Timer mode** - automatically turns unit off if left on accidentally.
- **Dimmer mode** - allows for variable power output.
- **Flasher mode** - high visibility blinking mode with variable rate.
- **Strobe mode** - short exposure for stop-action effects with variable rate.
- **Dazzle mode** - great for attention-getting needs like sales presentations or product promotions.
- **S.O.S. mode** - emergency distress mode sends the morse code S.O.S. international distress call continuously.
- **Pulse mode** - allows user to send code or signals.

With all this sophistication, it's still easy to use. The pleasant one-handed operation makes turning the unit on and off simple enough for a two-year-old child.

"it has exceeded my every expectation and has been worth much more than I spent!" - Barbara Barkus (hurricane survivor)

Model 2 - "Classic" distinct features:

- Our original model. Has all the standard features with the same power output as our Model 3's.
- Smallest package, only 3" X 2 1/4" X 3/4".
- Weighs only 4 oz as equipped with Energizer AA alkaline batteries.
- Rectangular shape allows unit to stand by itself in four different positions or be easily mounted to caps, gloves or other items.

• Morse code chart printed on front.

*MSRP \$39.99 - Part #HWPDFLM20

"My wife even kids me sometimes and asks if I have my American Express light, because it is rare that I leave home without it!" - Jack Balazs (fire department battalion chief)

Model 3 - "Ergo" distinct features:

- Measures 2 5/8" X 3 5/8" X 1".
- Water resistant.
- Weighs only 4 oz as equipped with Energizer AA alkaline batteries.
- Highly durable, impact resistant.
- Lanyard hole for easy tethering.
- Recessed lamp setting holds alignment longer.
- Will FLOAT when lithium batteries are installed.

*MSRP \$59.99 - Part #HWPDFLM30

"it offers superior performance and variable intensity, the best of the AA-cell models-" - The Aviation Consumer magazine (March 2000)

Model 3M - "Ergo-Marine" distinct features:

- Same features, shape and size as Model 3 but in Marine Yellow.
- Weighs only 3.25 oz as equipped with Energizer AA lithium batteries.
- FLOATS in fresh and salt water.
- Equipped with lithium AA batteries for even longer life, less weight and longer shelf life.

*MSRP \$79.99 - Part #HWPDFLM3M
