

# EternaLight "Smart Series" White LED Flashlights

The world's first microprocessor controlled white LED flashlights. EternaLights are the most technologically advanced pocket flashlights available. No other flashlight in the world is as small, as powerful, as durable, as functional, and can last as long on a single set of batteries.

Four independent solid-state white LED bulbs insure power, durability, reliability, and safety. Each bulb is rated at up to 100,000 hours of continuous use. The built-in microprocessor controls power utilization to extend battery life way beyond ordinary flashlights -- up to 700 hours for Energizer or Duracell alkaline batteries!

## Modes of operation:

- **Timer mode** - automatically turns the unit off if left on accidentally
- **Dimmer mode** - allows for variable light power output
- **Flasher mode** - high visibility blinking mode with variable rate
- **Strobe mode** - short exposure for stop-action effects
- **Dazzle mode** - great for attention getting needs like sales presentations or product promotions
- **S.O.S. mode** - emergency distress mode sends the morse code S.O.S. international distress call continuously
- **Momentary mode** - allows user to send code and signals

## Features (all models):

- Simple one-handed operation -- easy enough for a two year old to use
- Up to 700 hours of battery life from Energizer or Duracell AA alkaline batteries
- Visible from over 3 miles away
- Illuminates objects over 80 feet
- Water resistant down to 100 feet
- Will FLOAT when lithium batteries are installed
- High-quality impact resistant ABS plastic construction will withstand a 10 foot drop onto concrete
- Unique and attractive shape and style is ergonomically comfortable to hold
- Measures only 2.6" X 3.6" X 1", weighs only 4 oz with AA alkaline batteries (less with lithium)
- Lanyard hole
- Limited Lifetime Warranty

### "Ergo"

Molded in classy black ABS. Standard "Smart Series" features. Includes 3 AA Energizer Alkaline batteries.

### "ErgoXRay"

Molded in futuristic **trans-lucent blue** ABS. Standard "Smart Series" features with an extra internal blue LED to illuminate the case in darkness. Includes 3 AA Energizer Alkaline batteries.

### "ErgoMarine"

Molded in eye-catching **marine yellow** ABS. Standard "Smart Series" features. Includes 3 AA Energizer Lithium batteries for longer life and lighter weight (it floats!).
