

eternaLight

RAVE'N² party light

"The coolest flashlight ever made!"

The Rave'n² Party Light is much more than just an LED flashlight, it features high-intensity RED, GREEN, YELLOW, and BLUE LED's that combine to make an almost white beam but with its independent microprocessor control of each LED, the Rave'n² can create dazzling lighting effects and play exciting party games.

Inspired by the Rave dance style this unit enhances dancing by providing cool personal light effects. Of course, it may just be the funnest flashlight you've ever owned, even if your not a kid!

Cool Features:

- Battery life up to 500 hours! Uses 3 regular AA alkaline batteries (included)
- Up to 100,000 hour lamp life!
- Water resisant up to 100 feet.
- Ergonomic Shape - comfortable to hold.
- Large strong layard hole - easily attaches to strings, ropes, clips, etc.
- Battery saving timer!
- Dimmable
- Visible from over 2 miles!
- Glow-in-dark keypad!
- Will withstand 10 foot drop onto concrete

Games and Special Effects:

- "Timer" - helps save batteries
- "On/Dim" - 9 levels of brightness!
- "Dice" - pick a color, Rave'n² SPINS and picks one!
- "Drag Race" - imitates a drag race signal tree.
- "Stop Light" - imitates a stop light
- "Cops" - flashes red/blue blinking sequence like a police car!
- "Flasher" - flashes all lights, rate is controllable
- "Strobe" - stroboscopic flashing of all lights
- "Blaster" - lies dormant with a quick/dim sequencer but BLAST's full power when adjust button is pressed
- "Sequence" - runs each LED sequentially and repeats
- "Chase" - turns off each LED sequentiall and repeats
- "UFO" - gradually brightens and dims all lamps in a smooth action

Ages 6 to 60!

VersaLux

Utility Light Module

The VersaLux Utility Light Module is a 2.2-13.8 volt DC light module incorporating 10 White LED's and regulated power supply circuit which provides adjustable constant light output over the entire voltage range.

Features:

- 100,000 (11.4 years, continuous) lamp life
- Works with 2.2 to 13.8 volts DC
- Light output is constant even when battery voltage drops off
- Only 1.18 tall by 1.95 inches wide by 1.2 inches thick
- Perfect for replacement of 3-12 volt lamps in flashlights, lamps, RV's, etc.
- Light output is adjustable from 0% to 100% of total power output

PR-2 Lamp

A White LED in a standard PR-2 flashlight bulb base with an integrated power inverter for low voltage (3V DC) operation.

Features:

- Pop-in replacement for ordinary PR-2 flashlight bulbs
- 4 times more battery life
- up to 25,000 hour lamp life compared to 10 or 20 hours from filament bulbs!
- Smoother lighting pattern
- Even brilliant white that never yellows as batteries drain
- Superior shock and abuse resistance - solid state light is much more durable than filament bulbs
